

# RESEARCH OPPORTUNITY!

Participate from your home computer

If you have Trisomy X, you have 47 chromosomes.  
So why does ONE get all the attention?

## Let's talk about the other 46!

By studying the impact of family background, we hope to better understand and personalize interventions for girls with trisomy X.

**We need your help!** Please contact Rebecca Procopio at 570.522.9423 or [raprocopio@geisinger.edu](mailto:raprocopio@geisinger.edu) or visit [geisingerADMI.org/SCA](http://geisingerADMI.org/SCA) to learn more about how you can participate through online questionnaires.
